

Meet Our Team

ERICK BERGQUIST, M.D., PH.D.

Dr. Bergquist is an infectious disease specialist. He is originally from Philadelphia and received his Ph.D. in parasitology from the University of Maryland in College Park, MD. He then completed his medical degree at Jefferson Medical College of Thomas Jefferson University in Philadelphia.

Following his education, Dr. Bergquist completed both an internal medicine internship and residency at Thomas Jefferson University Hospital. He then completed an infectious disease fellowship at the University of Maryland/ Baltimore V.A. Medical Center.

Dr. Bergquist has held various academic positions at Thomas Jefferson University. His exceptional performance in these positions led him to receive several teaching honors and awards. Accordingly, he completed 21 publications for academic journals on infectious disease topics such as urinary tract infections and prophylactic antibiotics.

Throughout his professional career, Dr. Bergquist has been extremely supportive of organized medicine. He exemplifies this through memberships with the American Medical Association, the Pennsylvania Medical Society, the Indiana County Medical Society, and the Pennsylvania Medical Political Action Committee.

Outside of his profession, Dr. Bergquist enjoys gardening and doing home improvement.

IRMC

PHYSICIAN GROUP

THE COMMUNITY'S CHOICE

Infectious Diseases

About Us

IRMC Physician Group Infectious Diseases specializes in the study and treatment of diseases caused by viruses, bacteria, fungi, and parasites. An infectious disease specialist is needed when a condition is difficult to diagnose, a patient does not respond to treatment, and an infection is accompanied by a high fever. These physicians can also help identify outbreaks of epidemics and pandemic situations.

These specialists are experts at reviewing medical data, performing physical examinations, and consulting with patients to discover the complex issue at hand.

At IRMC Physician Group, our infectious disease specialist has extensive educational and medical training to meet your needs. We can help you uncover and understand your disease and learn how to prevent its recurrence.

**See Travel Medicine Brochure for more services*

Conditions Treated

LYME DISEASE

Lyme Disease occurs when a tick infected with *Borrelia burgdorferi* bacteria is attached to the body for an extended period of time (usually 2 days). Symptoms are similar to the flu or mononucleosis.

PNEUMONIA

Pneumonia is an infection or inflammation in the lungs. It may be caused by infection with bacteria, viruses, mycoplasmas, or fungi. Some symptoms include chills, chest pain, cough, and nausea.

URINARY TRACT INFECTIONS

A urinary tract infection occurs when bacteria infect the urinary tract. Women are more susceptible to this than men. Symptoms include frequent urination, pain while urinating, cloudy urine, and fatigue.
